#### Call for Sponsorship

You are cordially invited to the 8<sup>th</sup> Conference of the African Association of Remote Sensing of the Environment – AARSE2010. The Conference will take place from 25-29 October 2010 in Addis Ababa, Ethiopia. This 8<sup>th</sup> session will represent a major event in the long series of internationally recognized AARSE conferences. AARSE 2010 takes place at a strategic moment, when Africa faces major pressing issues such as climate change impact, water scarcity, energy shortage, environmental stresses and food crisis, which affect citizens, business and the community at large. On all these challenges, Earth Observation can play a greater role in providing factual, precise and updated information for better decision-making.

The overall theme of AARSE2010 is Earth Observation for Africa's Development Agenda. Its four major scientific sub-themes are:

- Food and water security
- Energy resources
- Disaster risk reduction
- Marine and costal management.

Topics of a more operational nature are:

- Capacity-building: achievement and challenges
- Spatial Data Infrastructure, SDI
- Space Policy in Africa
- National and regional programs and projects, and
- Products.

The Conference will include plenary and thematic sessions, poster and discussion sessions as well as side events on issues of interest to scientists, policy makers and resource managers in the public and private sectors.

Local and international co-sponsors are invited to participate at the conference. The following categories of sponsorship are available:
